CALL FOR PAPERS

The Kansas Geological Society Bulletin, which is published bimonthly both in hard-copy and electronic format, seeks short papers dealing with any aspect of Kansas geology, including petroleum geology, studies of producing oil or gas fields, and outcrop or conceptual studies. Maximum printed length of papers is 5 pages as they appear in the Bulletin, including text, references, figures and/or tables, and figure/table captions. Inquiries regarding manuscripts should be sent to Rebecca Radford, manager@kgslibrary.com or mailed to 212 N. Market, Ste. 100, Wichita, KS 67202. Specific guidelines for manuscript submission appear in each issue of the Bulletin, which can also be accessed on-line at the Kansas Geological Society web site at http://www.kgslibrary.com

SOCIETY Technical Meetings

2015 Technical Talks

Mar. 3— "Woodford Shale as a Source/Reservoir Rock" - Brian Cardott

Apr. 9— (A Thursday) "Fort Hays State Student Presentations" - Dr. Hendratta Ali's petroleum class

Apr. 23— (A Thursday) "Pressure Architecture of Selected Sedimentary Basins: Implications for Oilfield Brine Disposal in Oklahoma" - Dr. Jim Puckette

May 26—WSU Student Field Studies—Larry Richardson's class

For More Information or suggestions of speakers please contact Dave Clothier: dave@mccoypetroleum.com

Note: For those geologists who need 30 points to renew their licenses, there will be a sign-in sheet at each presentation and also a certificate of attendance.

Please remember to check the website for the most up to date information on Technical Talks http://www.kgslibrary.com/techtalks.cfm

CONGRATULATIONS!!

Tom Dudgeon correctly identified The last one as: Andegavia

Bulletin committee members and PhD's in Paleontology are prohibited from entering.

President's Letter

Dear KGS Members,

This year's banquet was certainly one to remember. The highlight of the evening began with the background story of Bob O'Dell's continuous involvement with our Society, and all of his unselfish actions to all of our benefit. But the high water mark was Bob's powerful response upon receiving this award. It was one of the most moving demonstrations of good character I have ever witnessed.

It was also a testimony of many other distinguished individuals of good character in our industry. Dave Clothier and his Distinguished Awards committee certainly deserve our compliments for a job well done in choosing such a deserving candidate. Additionally, we owe thanks to Doug Davis for guiding us humorously through the evening, and Bob Bayer for his flawless planning of the event.

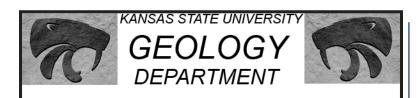

I would encourage all of our members to regularly attend our technical sessions. Dave Clothier's group, under Bob Cowdery's wing, continue to provide us with excellent and informative sessions. If you are unsure of what is on our agenda, please either call our office or preferentially, check our website for upcoming speakers and times.

This year's AAPG convention is May 31 through June 3 in Denver, Colorado. Early registration ends in the first few days of April, so get your reservations in quickly if you wish to save some money.

In our last board meeting we had a long discussion about how we can gain a greater yield for our liquid accounts. That and some building issues will continue to be our primary focus in the short term, along with the general operation of the digital and paper library.

The picture, which I neglected to caption last month, is one that falls into the category of "my bucket list", where I am standing to the right of the spread-center of the North American Plate and the European Plate, northeast of Reykjavík, Iceland. This picture was taken early last fall. If anyone else has any "bucket list" photos, please submit them to Rebecca, and we will see what we can do about including them in the Bulletin.

From The Manager

Dear Members,

Well it has certainly slowed down in Kansas and everywhere else as far as drilling activity. Let's hope this doesn't last too long.

I am very pleased to announce that Ernie Morrison has agreed to be the new Editor of the Bulletin. Thank you Ernie! He will be working to bring you more articles of interest so if you have anything to offer, please let Ernie or myself know. Many of you do have some time on your hands right now so maybe you should be thinking about writing up a paper of interest to your peers.

The library is working to get those Eastern Kansas logs and plotted geo reports into our database and scanned to be added to Walters Digital Library. I try to keep an updated graphic on the web page to let you know what has been added.

We had a wonderful time at the Annual Banquet this year. We honored Bob O'Dell as Honorary member and we also had one 50 year member this year, Billy Johnson. Photo below and more photos throughout this Bulletin.

Stay warm and remember that spring is just around the corner!

Respectfully submitted,

Rebecca Radford

Transporting Oil: a quick overview by Ernie Morrison

On February 15, 2015 a 109 crude oil tanker train had a 26 tanker car derailment with 19 of the tankers involved in the ensuing fire. One of the factors that could have resulted in the derailment could have been the severe weather conditions with snow drifting onto the tracks. This all happened near Boomer, West Virginia; a town of about 615 located in South Central West Virginia on the Kanawha River. Due to the remote location there was one person injured and one home destroyed. Some of the crude oil was spilled into the Kanawha River causing possible problems in the downstream; not surprising when you consider each tank car contained about 30,000 gallons of Bakken crude oil.

Photos by Dan Tomey

As you can see the winter conditions have added to the problem of clean up with some concern the oil is under the ice in the river.

In an amazing bit of bad luck on February 14, 2015 29 tanker cars out of 100 that were carrying Bakken crude oil derailed and caught fire in a remote area of Ontario, Canada. Late reporting of this incident has caused concern for the Mattagami First Nation, an Indian Tribe that fishes and trapes in the area. Again, due to the remote location of the spill no injuries were reported.

Although the two accidents that took place earlier this month were terrible, neither was the disaster that occurred in Lac-Meganitc, Quebec in July of 2013. An unattended tanker car train full of Bakken crude rolled down a hill, derailed and killed 47 people. The train was parked on a hill with one attendant when the brakes that were set failed. About one-third of the cars were breached which resulted in this accident that also destroyed 30 buildings in the town

Photo from Zig Zag: A Warrior Publication

Photo from The Globe

The news reports refer again and again about the Bakken crude and how it is so explosive. The National Petroleum Council reports the properties of the Bakken being very similar to the bench mark West Texas Intermediate. This would make one think that the crude is a good clean crude but not anymore volatile than many other crude oils. More safety measure have been implemented since the disaster in Lac-Megantic. New tankers have been and are being built to replace the outdated and unsafe cars.

The slow down due to oil prices may alleviate some of the dangers of railroad transport due to the decrease in volume of trains carrying crude. According to the Association of American Railroads in 2008 railroads originated 9,500 carloads of crude oil and in the first half of 2014 had over 229,798 carloads of crude oil. In response to this, railroads have taken measures to insure the safety of transporting crude oil. Over 20,000 emergency responders are trained each year and training continues. As of July of last year specialized track side detectors have been installed at least every 40 miles with routes that trains of 20 cars or more are transporting crude oil. In addition to these detectors that measure the wheel bearings and the heat generated, the Rail Corridor Risk Management System has been implemented to model and report over 27 different risk factors such as trip length, population density and hazmat volume. Railroad transport is being enjoyed as a supplement to crude that has historically been transported by pipelines. This increase is due, in a large part, to the success within the Bakken Shale and the remote nature of the crude or lack of pipeline infrastructure.

The advocates for the Keystone XI pipeline point to these rail accidents and make a case for pipeline installation. This sounds as if it is the answer to all the transport problems but in April 2013 a pipeline spill in Mayflower, Arkansas resulted in the spillage of thousands of barrels of crude oil. In January a pipeline in Montana ruptured and spilled over 30,000 gallons of Bakken crude into the Yellowstone River. This is an area where bald eagles were nesting and an endangered species of sturgeon is found.

Is trucking the only safe solution? With the volume of crude oil that needs to be transported to make the US more energy sufficient, trucking is almost out of the question. It is a matter of more pipelines that are monitored. Remember that pipelines have less spills but they tend to spill more volume of crude oil. I think you can discount the Bakken oil as being too explosive to transport and it helps to remember that the Bakken is one way to help the US gain some sort of energy independence.

Memorial - Orlin Phelps

Olin R. Phelps was born on March 25, 1924 in Beaumont, Kansas and died January 27, 2015. Orlin began his education in a one-room country schoolhouse, graduating from El Dorado High School in 1941. He left soon after graduating to join the Army Air Corps working his way to serve as a Fighter Pilot before his discharge in 1945. After his military service, he entered Wichita University to study engineering; but after exposure to a geology course, he was hooked on that discipline and excelled as he did in anything he set his mind to.

As a geologist his main exploration for petroleum was primarily in northwest Kansas. He surpassed his goal of having a discovery for every year he lived. A special love he had was for the landscape tree farm he started on his father's farm in Augusta. KS in the early 1990's. He received much joy in growing the trees and

providing their beauty to home owners in Sedgwick and Butler Counties. Throughout his life he showed talent as a scientist, inventor, carpenter, entrepreneur horticulturist, aviator and sports car enthusiast. Orlin was a long –time member of the Kansas Geological Society.

Orlin is survived by his son, Olin Gregory Phelps (Melissa S. Phelps); daughters, Marsha Kay Phelps and Brenda Sue Phelps of Wichita, KS; son Shawn Edgar Phelps of Augusta, KS; grandchildren, Alex Phelps and Zach Phelps of Augusta, KS and Tanner Kaye Phelps-Sampino of Wichita; the mother of his children, Mary Nadine Phelps; and his elder sister, Rogene Stephens of Lewisville, TX. He was preceded in death by his father and mother, Orlin Alison Phelps and Anna Mae Phelps (Edgar); brother, Donald E. Phelps, and sister, Treva Demo, of El Dorado, KS.

A not-for-profit educational and scientific corporation

GOALS:

- promote geology and earth science
- preserve geological records
- establish memorials and endowments
- support field trips and seminars
- financial aid and grants to students

PLEASE HELP SUPPORT THE FOUNDATION

Kansas Geological Foundation Services

The Kansas Geological Foundation provides the following services as a part of the organization's commitment to educate the public regarding earth science.

Speaker's Bureau

A list of speakers available to talk about various aspects of geology may be obtained by contacting Janice Bright at the KGS Library, 265-8676. This service is free to the public.

DVD/Videotape Library

The KGF maintains a DVD & videotape library focused primarily on the various fields of earth science. These tapes may be checked out without charge by the public. To obtain a list of tapes, please contact the KGS Library, 212 N. Market, Ste. 100, Wichita, KS 67202, or call Janice Bright at 265-8676.

The Kansas Geological Foundation was founded in March, 1989 as a not-for-profit corporation under the guidelines of section 501(c)(3) of the tax code to provide individuals and corporations the opportunity to further the science of geology. It is dedicated to providing charitable, scientific, literary and educational opportunities in the field of geology for the professional geologist as well as the general public.

KGF can receive in-kind donations through which the donor may receive a tax deduction. Of equal importance, the KGF provides the financial resources to sort, process and file this data at the KGS library. If you have a donation to make, please contact the KGF at 265-8676.

Your tax-deductible membership donation helps to defray the cost of processing donations and to support public education programs about the science of geology. Annual membership begins at \$50.00 per year. Donations of \$100.00 or more are encouraged through the following clubs:

Century Club	\$ 100 to \$ 499
\$500 Club	\$ 500 to \$ 999
Millennium Club	\$1000 to \$5000
President's Club	\$5000 and over

Exploration Highlights

By John H. Morrison, III Independent Oil & Gas

1-Murfin Drilling Company, Wichita (KS), has discovered new Lansing-Kansas City oil reserves at the 1-29 Bash (API 15-023-21409) exploratory well in Cheyenne County, northwest Kansas. The new Devil's Canyon North pool opener is producing oil in the NE/4 of section 29- T1s- R38W, about thirteen miles north and three miles west of Bird City. The well was drilled to a depth of 5,002 ft in Granite rock. The new reserves lie over one mile north of the Devil's Canyon field (estbl. 1988, LKC oil).

2-VAL Energy, Wichita (KS), has a new Cherokee (Johnson Zone) oil discovery in western Thomas County. The 1-21 Otto (API 15-193-20938) is on pump making an undisclosed amount of oil at site located in the NW/4 of section 21- T8s-R35W, about 7 miles east of the town of Brewster. The wildcat well opens the Schroeder Southeast oil field nearly one and one-quarter miles east of Val's John lease in section 20, which also produced Cherokee oil last year and established the Schroeder East field.

3-Larson Operating Company, Olmitz (KS), is producing oil from the Lansing-Kansas City formation at their 1-32 Lora (API 15-101-22535), spotted in the SE/4 of section 32-T19s- R29W in Lane County. The wildcat well establishes new production over 1one and one-half miles east of the Clark Southeast oil field (est. 2009, LKC and Marmaton), or about 9 miles southwest of Dighton, Kansas. Rotary total depth was stopped at 4,675 ft. No completion details are available. The new field has been given the name Frontier East.

4-Samuel Gary Jr & Associates, Inc., Denver (CO), has discovered oil deposits in the Celia Sand member of the Marmaton Group at the 1-3 Fisher Cattle Company (API 15-153-21051), spotted in the NW/4 of section 3- T4s- R36W, in Rawlins County. The new Wind Crest West pool opener found new reserves nearly one mile southeast of established production in the Celia South oil field (estbl. 1983, Marmaton, Cherokee oil) and about three miles southeast of the town of McDonald, Kansas. Total depth of the well is 4,949 ft.

5-Raymond Oil Company, Inc., Wichita (KS), has successfully completed the 1 Baird Revocable Trust (API 15-193-20931) as a commercial oil well to open the Sun Dog oil field in Thomas County. Discovery was made in the SE/4 of section 25-T6s-R36W, nearly two miles south of the WWM oil field (estbl. 1979, Marmaton oil). The 4,876 ft deep well is producing crude from the Marmaton (Pawnee) formation, about ten miles northeast of Brewster, Kansas.

6-Questa Energy Corporation, Amarillo (TX), is producing crude oil from the Lansing – Kansas City formation at the 1-36 Bird (API 15-063-22211), located in the NW/4 of section 36- T13s- R27W, in Gove County. The wildcat well was drilled to a total depth of 4,460 ft at site situated about twelve miles southeast of Gove, Kansas. Operator stepped-out almost one and one-half miles north of the established Sutcliffe field (estbl. 1971, LKC, Miss oil) to find the new reserves. The new field has been named. Sutcliffe North.

7-Samuel Gary Jr. & Associates, Inc., of Denver (CO), has discovered new Marmaton (Pawnee) oil reserves at the 1-12 Fisher Cattle Company (API 15-153-21056) – a remote exploratory well drilled in Rawlins County. Crude oil is being produced at location in the SW/4 of section 12- T4s- R36W, two miles southeast of the Windy Ridge field (Arbuckle oil), or 5.5 miles southeast of the town of McDonald. Total depth was logged at 4,912 ft. The new field been named FCC.

8-Staab Oil Company, Hays (KS), is pumping 15 bbl of oil per day, no water, at the 1 Hayes (API 15-163-24251) wildcat discovery well in Rooks County. The new Webster View Southeast pool opener is drilled to a total depth in the Arbuckle of 3,480 ft and is producing 30-degree gravity crude from Arbuckle perforations at a depth between 3,423 to 3,426 ft. Closest known established production lies over one mile away from the new discovery in the Sweet North field (estbl. 1988, Conglomerate, Arbuckle oil). Staab's new discovery is located over five miles southwest of Stockton, Kansas.

9-Sandlin Oil Corporation, Denver (CO), has completed their #1 Brown Etal (API 15-163-24233) for 20 bbls of oil and an equal amount of water per day. The 3,650 ft deep wildcat well was drilled in the NE/4 of section 17- T10s- R16W, in Rooks County. The well establishes production from the Lansing – Kansas City formation at site located over three-quarters mile west of the Natoma Northwest field (estbl. 1965, Shawnee, LKC oil), or a little over two miles east of Codell, Kansas. The well establishes the Codell East field..

10-American Warrior, Inc., Garden City (KS), is producing oil from the Mississippian (Saint Louis) formation at the 1-5 O'Brate – Finney (API 15-055-22360), located in the SW/4 of section 5- T23s- R32W, in Finney County. The wildcat well establishes new production over one and one-half miles southeast of the Damme East field (estbl. 1992, Marmaton oil). Total depth was stopped at 5,000 ft. The new Seven Mile field lies just over six miles north of Garden City, Kansas.

The newly graduated and the seasoned professionals mingling at the banquet.

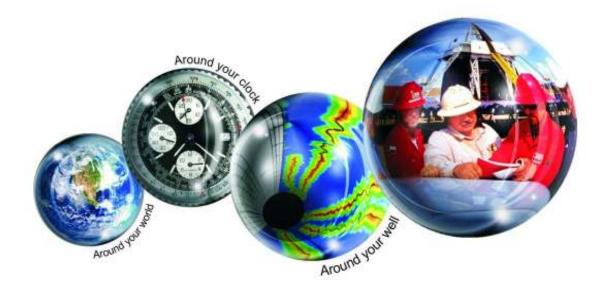

Our student helpers Shuyao Li & Mozhdeh Mobayen

All Around You

Weatherford has always been driven by your needs.

Now, with the addition of Precision Energy Services we're continuing to build a world of skills, services and technologies that revolve – and evolve – around you.

The result?

An expanded global network of 25,000 people, 730 service bases and 87 manufacturing facilities in 100 countries.

This increased local knowledge and service is there to support you anywhere, anytime. From midday in the Middle East to midnight in the middle of nowhere.

And with greatly strengthened capabilities in the critical evaluation skills of directional drilling and wireline logging, we can do even more to improve the profitability and productivity of your wells.

To see how our sphere of services can work for you, visit www.weatherford.com or contact either your Weatherford or former Precision Energy Services representative.
